Oxford Journals

Journal of Experimental Botany

for all aspects of Physiology, Functional Anatomy, Ultrastructure, Plant Biochemistry and Biophysics.

An Official Organ of the Society of Experimental Biology of the United Kingdom.

Editor: W. W. Schwabe

Associate Editors: D.T. Clarkson, J. L. Hall, D. H. Jennings, A. J. Keys, H. Meidner, B. J. Miflin, A. W. Robards, M. M. Yeoman.

Established for over 30 years and currently published bi-monthly, the Journal will appear monthly from 1983. In addition to research papers and reviews of significant books, occasional review articles will also be included.

The Journal is international in its coverage and suitable papers are accepted from all countries and regardless of membership of the SEB.

Special subscription rates are available for members of the SEB. For details of substantial discounts which are now being offered to other individuals affiliated to the FESPP, and for details of library subscriptions, please write to:

An International Journal published by The Japanese Society of Plant Physiologists

PLANT CELL

PHYSIOLOGY

PLANT AND CELL PHYSIOLOGY is devoted to publication of results of original researches pertaining to physiology and biochemistry of plants and microorganisms, including the areas of physiological and biochemical cytology. Short communications of completed investigations, which will not be included in later papers are also welcome.

PLANT AND CELL PHYSIOLOGY is published with eight issues per volume by the Japanese Society of Plant Physiologists. Members of the Society receive the Journal free of charge and hold right to submit papers to the Journal.

We invite researchers and students working in the above or related fields to become members of the Society.

Subscription by institutions is also welcome.

Membership fee for individual: \$30.00 per year Subscription rate for institutions: \$110.00 per year (for 1982)

Some articles appearing in Volume 23 (1982):

Intergeneric translocation of floral stimulus across a graft in monoecious Cucurbitaceae with special reference to the sex expression of flowers. by H. Takahashi, T. Saito and H. Suge Alkalinity-induced aggregation in Chlorella vulgaris II. Changes in the cell wall during the cell cycle. by S. Malis-Arad and R. E. McGowan

Changes in polyamine titer in etiolated pea seedlings following red light treatment. by R. Goren, N. Palavan, H. Flores and A. W. Galston

Effects of nutritional levels of phosphate on photosynthesis and growth studied with single, rooted leaf of dwarf bean. by S. Sawada, T. Igarashi and S. Miyachi

Effects of the inhibitory protein of ethylene synthesis on ATP levels in mung bean hypocotyl segments. by S. Sakai

Dormancy and impotency of cocklebur seeds VIII. Lack of germination responsiveness in primarily dormant seeds to cyanide, azide, anoxia and chilling. by Y. Esashi, H. Komatsu, N. Ishihara and K. Ishizawa
